SCORING RULES (Total: 10)

1. Interest / Skill Match (0–4)
- 4 = strongly aligned with analytics, financ
data, operations
- 2 = somewhat aligned
- 0 = unrelated

2. Pay (0–3)
- 3 = >$25/hr or >$50k/year
- 2 = $20–25/hr
- 1 = unknown
- 0 = < $20/hr

3. Location (0–2)
- 2 = NYC, NY, hybrid, or remote
- 1 = nearby states (NJ, CT, PA)
- 0 = anywhere else

4. Role Type (0–1)
- 1 = internship, part-time, flexible
- 0 = full-time

```
You are an intelligent job-matching assistant built for a
student named Alex Santos.
You ONLY recommend or highly score jobs that match Alex’s
preferences below.

ALEX SANTOS JOB PREFERENCES:
- Finance, analytics, data, AI automation, operations,
business, tech roles
- NYC / New York roles (highest priority)
- Hybrid or remote positions
- Pay above $20/hour
- Internship, part-time, flexible roles (NOT full-time
roles)
- Growth, mentorship, learning experience preferred

REJECT OR LOW-SCORE JOBS IF:
- They are unrelated (retail, hospitality, manual labor,
unrelated customer service)
- They are full-time
- They pay under $20/hr
- They are not in NYC or remote/hybrid
- They do not involve analytics, finance, AI, tech, or
operations

Your job is to give a score from 0–10 based ONLY on these
criteria.

You MUST output only a raw JSON object with NO backticks,
NO code blocks, and NO markdown.

The output MUST follow exactly this structure:
```

You are an AI-generated cover letter for Alex Santos. Your job is to create a personalized, compelling, well-written cover letter for each job using Alex's resume and background.

Write in a professional but human tone. Avoid fluff. Customize the letter heavil
for the specific company, job title, job responsibilities, and industry. Always sounds like Alex.

        \n\nDear Hiring Team,\n\nI'm excited to apply
        for the Business Analyst position specializing
        in strategic financial planning, forecasting,
        and performance analysis. With a strong
        foundation in finance and business analytics,
        hands-on experience using Excel, SQL, and
        Tableau in fast-paced environments, and a
        continuous drive to turn data into action, I'm
        confident I can bring immediate value to your
        team.\n\nAt FanDuel Sports, I worked on the
        Revenue Operations team where I pulled
        commercial performance data, built interactive
        dashboards in Tableau, and conducted SQL-based
        analysis to inform pricing and strategy
        decisions. Partnering with cross-functional
        teams, I translated raw data into strategic
        insights that helped optimize campaign
        performance and increase rate card accuracy—
        experience that aligns directly with this
        role's focus on forecasting and financial
        modeling.\n\nMy technical work at Handshake AI
        further sharpened my analytical toolset. I

Dear Hiring Team,

As someone passionate about the intersection of sports, strategy, and data, I'm excited to apply for the Corporate Strategy Internship at ESPN. With a background in finance and analytics, combined with hands-on experience at companies like FanDuel and New York Life, I'm eager to contribute to ESPN's continued innovation—and learn from the best while doing it.

At FanDuel, I worked on revenue operations tied directly to sports campaigns, analyzing rate cards and building dashboards that shaped strategic pricing decisions. I've also led cross-functional projects that required financial modeling and data visualization, such as my leadership role on the NBA & NHL Rate Card Project. My role required both technical and strategic thinking—skills I'm confident will translate directly to the analysis and executive presentations at the core of this internship.

In addition to finance, I've had unique exposure to AI and operational strategy. At Handshake AI, I helped design automated systems and analyze user engagement to drive product improvements. For New York Life, I built dashboards, identified field performance trends, and supported a generative AI initiative in talent operations. Across each role, I've developed a strong toolkit in Python, Tableau, SQL, and Excel—complemented by solid business judgment and communication skills.

My experience—built at the nexus of sports, strategy, and technology—makes this internship especially meaningful. I'm currently pursuing my MBA as part of an accelerated program at SUNY New Paltz, and I'm excited to bring my analytical mindset and drive for impact to the ESPN team.

Thank you for considering my application. I'd be thrilled to contribute to ESPN's mission this summer.

Sincerely,
Alex Santos
