Knicks Player Stats 2024-2025 Season

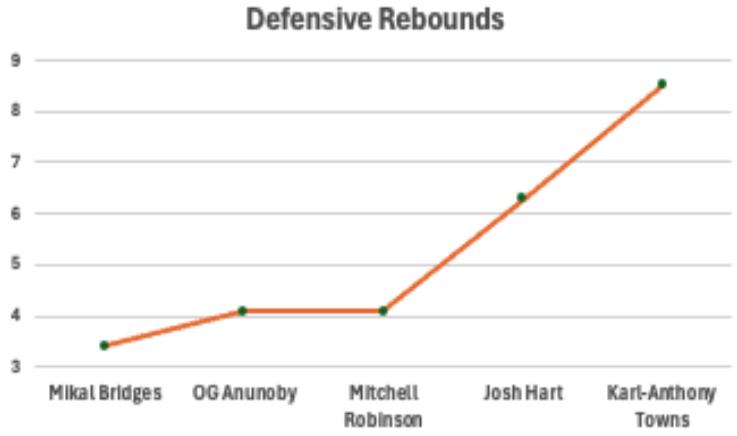

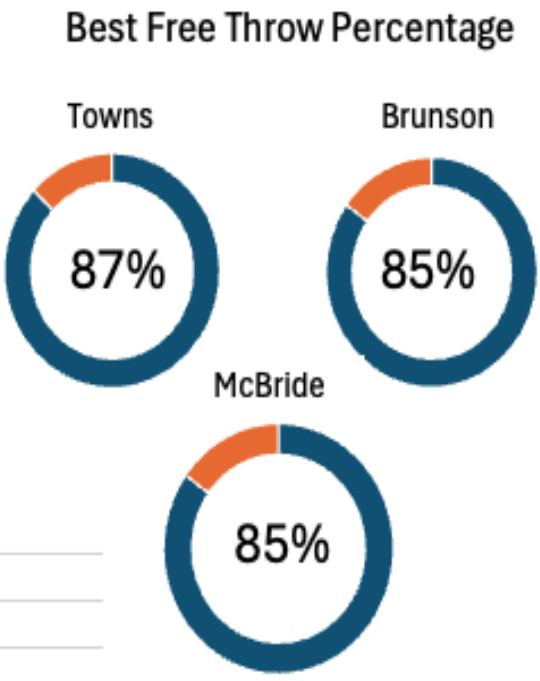

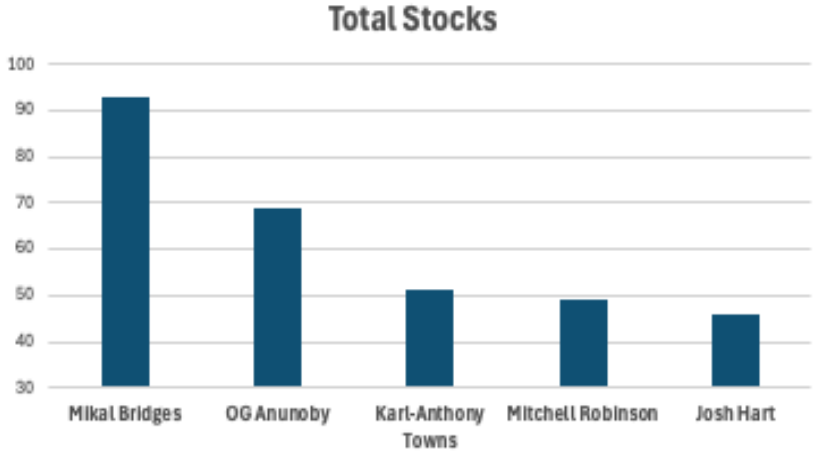

Most 3 Pointers

Jalen Brunson	103
Mikal Bridges	84
Miles McBride	78

```sql
### PURPOSE: Retrieve all individual player metrics for a full roster audit.

SELECT *
FROM knicksplayerstats;

### PURPOSE: Identify top 10 offensive leaders by total scoring.
###METRICS: Games Played (G), Points (PTS), and Shooting Efficiency (FG%).

SELECT Player, G, PTS, `FG%`
FROM knicksplayerstats
WHERE Player != 'Team Totals'
ORDER BY PTS DESC
LIMIT 10;

###PURPOSE: Isolate the most productive long-range shooters.
###INSIGHT: Helps determine which players provide the best floor spacing for the offense.

SELECT Player, 3P, `3P%`
FROM knicksplayerstats
WHERE Player != 'Team Totals'
ORDER BY 3P DESC
LIMIT 5;

###PURPOSE: Measure defensive rebounding consistency per game.
###LOGIC: (DRB / G) creates a normalized average to compare starters vs. bench players fairly.
###FILTER: G > 15 ensures we only look at players with a significant sample size.

SELECT Player, G, DRB, (DRB / G) AS Def_Rebounds_Per_Game
FROM knicksplayerstats
WHERE Player != 'Team Totals' AND G > 15
ORDER BY Def_Rebounds_Per_Game DESC;

###PURPOSE: Rank the most reliable Free Throw shooters.
###FILTER: FTA > 15 removes "statistical outliers" (players who made 1/1 for 100%).

SELECT Player, FT, FTA, `FT%`
FROM knicksplayerstats
WHERE FTA > 15 AND Player != 'Team Totals'
ORDER BY `FT%` DESC
LIMIT 10;

###PURPOSE: Identify the primary floor generals (Assists).

SELECT Player, AST
FROM knicksplayerstats
WHERE Player != 'Team Totals'
ORDER BY AST DESC
LIMIT 5;

###PURPOSE: Calculate "Total Stocks" (Steals + Blocks).
###INSIGHT: "Stocks" is a high-level analytics term for a player's total defensive disruptiveness.

SELECT Player, STL, BLK, (STL + BLK) AS Total_Stocks
FROM knicksplayerstats
WHERE Player != 'Team Totals'
ORDER BY Total_Stocks DESC
LIMIT 5;
```
