Data Analyst with enterprise experience building BI dashboards, financial reporting, and executive insights using SQL, AWS QuickSight, Power BI, and SAP/CDH. MBA candidate skilled in workflow automation, data reconciliation, and cross-functional stakeholder partnership.

WORK EXPERIENCE

Data Analyst | BMW Group | Mar 2026 – Present

- Developed and maintained 20+ enterprise BI dashboards in AWS QuickSight, cutting manual reporting time for accounting and finance teams by an est. 10–15 hours/week.
- Delivered executive-level KPI and financial reporting dashboards, consolidating multi-source data into a single source of truth for monthly and quarterly reviews.
- Led testing, validation, and UAT sign-off for BMW's migration from IFT to the GFBB platform, supporting 50+ end users with zero critical post-launch issues.
- Architected backend SQL queries, data models, and ETL logic using AWS Athena, SAP, and Cloud Data Hub (CDH), reducing dashboard load times by up to 30%.
- Automated recurring reporting workflows and resolved data discrepancies through reconciliation and root-cause analysis, cutting manual effort by roughly 20%.

Sales Lead | Zumiez | Aug 2022 – Feb 2026

- Exceeded Q4 sales goals by 65% through targeted marketing campaigns and optimized staffing strategies.
- Delivered personalized service and recommendations that boosted repeat business and customer loyalty.
- Led and trained a sales team of 11, improving productivity and overall store performance.

Revenue Operations Intern | FanDuel Sports | May 2025 – Aug 2025

- Built dynamic dashboards visualizing historical ad performance across NBA, NHL, and MLB markets, enabling precise CPM pricing.
- Monitored delivery pacing and forecasted impression volumes across 45+ ad campaigns, recommending pricing adjustments during high-demand games.
- Used advanced Excel (VLOOKUP, SUMIFS, Pivot Tables) and SQL to clean and analyze campaign datasets supporting pricing decisions.

Field Operations Specialist Intern | New York Life | May 2024 – Aug 2024

- Analyzed 12,000+ agent records in SQL and Excel to identify top performers and build BI dashboards informing regional resource allocation.
- Evaluated AI recruitment tools to support automation initiatives aimed at improving retention and reducing manual screening time.
- Updated KPI reports and executive presentations with new trends and metrics to ensure timely leadership communication.
